

IDEX Corporation Company Index

IDEX is an applied solutions provider serving niche markets worldwide. Our served markets include process industry and infrastructure-related applications, life science and medical technologies, industrial and municipal fire and rescue, and equipment associated with the retail dispensing of architectural paints and coatings. From leak detection within water infrastructure to enabling the push towards personalized medicine, IDEX is a leader in creating enabling technology, improving business prospects for a diverse customer set across the globe.

Dispensing

The mission of IDEX's global Dispensing business is providing our customers a highly accurate, repeatable precision dispense of any color or flavor, anywhere in the world. We are recognized the world over as the leader in wholesale and retail point-of-sale blending and tinting of paints and coatings. Our technologies are also being applied to solve real-time, made-to-order at point-of-sale needs, enabling the food and beverage industry to economically and efficiently expand and personalize their offerings to consumers. Our formula for success is based on our ability to develop the right solutions for our customers, encompassing complex formulations, increasingly precise and reliable custom dispensing technology, and an ability to gather valuable point-of-sale transactional data □ all supported by 24/7 customer service and support.

Dispensing Businesses:

Fast & Fluid Management , Fluid Management Americas

We offer a complete range of manual and automatic precision dispensing and mixing systems, software and service solutions for custom formulations at point-of-use or point-of-sale applications in retail, in-plant and commercial environments.

Fire & Safety/Diversified Products

Addressing the worldwide need for safety and preparedness, the IDEX Fire & Safety/Diversified Products business provides life-saving solutions □ like our Jaws of Life® rescue tools family and firefighting pumps and compressed air foam systems □ to meet the mission critical needs of fire, rescue, disaster teams and other first responders. We also produce engineered band clamping systems used worldwide in industrial and commercial markets □ from holding up traffic signals and road signs to sub-sea/marine applications that support the global energy and exploration markets.

Fire & Safety/Diversified Products Businesses:

BAND-IT

Engineered band clamping systems: band and buckle, preformed and flat clamps and ties, and color-coated band and clamps, made from a variety of stainless steel and other corrosion-resistant materials; associated powered production and hand-installation tools; hose fittings; cable management and identification systems; and mounting systems for traffic and safety signs and signals.

Fire Suppression Group (Class1/Godiva/Hale/)

Truck-mounted and portable fire pumps; stainless steel valves; foam and compressed air foam systems; pump modules and pump kits; electronic controls and information systems; conventional and networked electrical systems and mechanical components for fire, rescue and specialty vehicle markets.

IDEX Rescue (HURST Jaws of Life, LUKAS, VETTER)

Hydraulic Rescue Tools (Jaws of Life), Hydraulic re-railing equipment, Hydraulic lifting & positioning devices for various industrial applications, Pneumatic Lifting Bags for Disaster Recover, Lifting Bags for Aircraft Recovery, Emergency Shoring Equipment.

Fluid & Metering Technologies

IDEX Fluid & Metering Technologies are precision engineered pumps, meters and systems that move, measure and dispense high value liquids, gases and solids. Within the pump and flow metering world, we are recognized for our expertise in the precise handling of corrosive, abrasive, viscous, extreme temperature, fine particle and many other challenging applications. Our core capabilities support worldwide growth in the process industries, particularly the infrastructure-related markets like alternative fuels, chemical processing, and water treatment, as well as a growing range of highly precise sanitary applications within the pharmaceutical and food & beverage industries. With operations on six continents, we work continuously with our customers to develop the right applied solution to meet their specifications, anywhere in the world.

IDEX Fluid & Metering Businesses:

ADS LLC (ADS Environmental Services/Hydra-Stop/Accusonic/IETG)

Flow monitoring hardware, software, and services for wastewater collections, treatment systems, hydro-electric, and other open and closed channel applications including ultrasonic Doppler technology, transit-time, and cross correlation. Water distribution services including leak detection, large diameter leak detection, water audits, district measurements, valve maintenance, asset assessment, and non-revenue water recovery. Line stopping, line tapping, and valve insertion equipment and contract services for under pressure installations without system shutdown.

Banjo Corporation

Valves, pipe fittings, flanges, centrifugal pumps, cam lever couplings, strainers, filters, Intermediate Bulk Container valves and tank accessories targeting a range of agricultural and industrial applications.

IDEX Fluid Metering Technologies - Asia

www.idexfmt-asia.com

iPEK Spezial-TV

A leading provider of systems focused on infrastructure analysis, specifically waste water collection systems. iPEK, renowned for its quality and versatility, is a leading developer of remote controlled systems for infrastructure inspection.

www.ipek.at

Liquid Controls Group (Corken/Faure Herman/Liquid Controls/SAMPI/Sponsler/Toptech Systems)

Electronic registration and control systems; terminal automation software and electronics; mobile, point-of-sale data management systems; compressors; pumps and flow meters (positive displacement, turbine, ultrasonic, electromagnetic and coriolis mass) used in refined fuels, alternative fuels, liquefied petroleum gas, compressed & liquefied natural gas, aviation fuels, cryogenics, chemical and many other markets which require precision fluid-handling and metering.

OBL s.r.l.

Precision hydraulic and mechanical diaphragm metering pumps, plunger metering pumps, engineered system solutions, electronic controls and dispensing equipment used in a wide range of applications from municipal water and wastewater to the oil & gas markets to the pulp & paper industries and to food & beverage.

www.obl.it

Pulsafeeder

Precision diaphragm metering pumps, alloy and non-metallic gear pumps, centrifugal pumps, special purpose rotary pumps, peristaltic pumps, transfer pumps, engineered system solutions, electronic controls and dispensing equipment used in a wide range of applications from municipal water and wastewater to power generation to food & beverage to commercial laundry and dishwashing.

RICHTER Chemie-Technik

Global leading manufacturer of fluoroplastic lined corrosion-resistant magnetic drive and mechanical seal pumps, shut-off, control and safety valves for corrosive, hazardous, contaminated, pure and high-purity fluids. For demanding applications in the chemical and pharmaceutical industries, in the semiconductor production, the petrochemical industry, metallurgy, pulp production, water desalination and treatment, food processing, environmental engineering and many other sectors.

www.richter-ct.com

Sanitary Group (Knight/Wright Flow Technologies)

Fine milling, emulsification and special-handling equipment and integrated systems used on liquid and solid particulates for laboratory, pilot phase and production-scale processing within the pharmaceutical and bio-pharmaceutical markets, as well as the food & beverage, personal care and fine chemicals markets. Circumferential piston, centrifugal, rotary lobe and air-operated diaphragm pumps and flow meters used in OEM equipment and process applications within the food & beverage, personal care, and pharmaceutical markets and a growing range of other sterile/sanitary applications.

Viking Pump

Rotary internal gear, external gear, vane and rotary lobe pumps; custom-engineered OEM pumps; strainers; gear reducers; engineered pump systems and related electronic controls for diverse application in industries ranging from chemical processing, alternative fuels, and paints & coatings to construction, transportation, renewable energy and many others.

Health & Science Technologies

Designs, develops, and manufactures liquid subassemblies and precision components for a wide range of applications requiring precise control and measurement. Specializing in component integration that results in innovative and optimized OEM fluidic systems, IDEX Health & Science is the synthesis of leading component and technology suppliers to the Analytical Instrument, In Vitro Diagnostics, and Biotechnology markets. Product range includes: Eastern Plastics manifolds and precision plastic parts; Innovadyne automated liquid handling systems; Ismatec peristaltic pumps and advanced microprocessor controllers and drives; Isolation Technologies column hardware; Rheodyne fluidic valves; Sapphire Engineering precision dispense pumps and HPLC components; Systec degassers/debubblers; and Upchurch Scientific tubing, fittings, and customized assemblies.

IDEX Health & Science Businesses:

Advanced Thin Films

ATFilms specializes in the most advanced coating technology available, ion beam sputtering (IBS), mastering the deposition of precise, dense, and durable films.

www.atfilms.com

CVI Melles Griot

Global leader in the design and manufacture of products that enable the practical application of light. CVI Melles Griot serves the semiconductor, biotech, industrial, commercial, aerospace and research industries, and is a leading global supplier of photonics products including optical components and systems, lasers, motion-control systems, laser measurement instrumentation and opto-mechanical hardware.

www.cvimellesgriot.com

Gast Manufacturing

Gast Manufacturing, Inc. designs and manufactures quality air-moving products - vacuum pumps, compressors, air motors, gear motors, vacuum generators, regenerative blowers and Smart Air technology - to meet the many challenging applications of OEMs and end-users worldwide. But much of our success can be attributed to the foresight of our founders, the dedication of several generations of employees, and an unwavering commitment to our customers.

www.gasthk.com

www.gastgroup.com

www.gastmfg.com

IDEX Health & Science Group (EPI/Ismatec/Sapphire Engineering/Upchurch Scientific/Innovadyne/Isolation Technologies/Systec/Rheodyne)

High precision, high performance pumps, injection valves, connective tubing, fittings, check valves, degassing systems, liquid-end assemblies, and flow cells used in configurations customized to the specifications of analytical, clinical diagnostics and biotechnology instrument manufacturers. High purity pumps, mixers, and deionized water heaters used in the semiconductor industry. Miniature, precision-engineered pump technologies, and vacuum pumps, compressors, air motors, blowers and other clean, quiet compressed-air solutions for medical, dental, environmental, food and beverage, agricultural, industrial, and a wide range of other end-market applications.

www.idex-hs.com

IDEX Pharma Group (Fitzpatrick/ Microfluidics/Quadro)

Powder, Particle and Liquid Processing Technologies (Size Reduction, Security Screening, Agglomeration, Mixing, Emulsion) for laboratory, pilot phase and production-scale processing in the Pharmaceutical, Food, Cosmetic & Personal Care and Fine Chemical industries.

www.fitzmill.com

www.microfluidicscorp.com

JUN-AIR

JUN-AIR is a leading supplier of quiet compressors. These compressors are designed for a countless number of applications and can be found in laboratories, dental clinics, medical, graphic and industrial applications worldwide.

www.jun-air.com

Micropump

Micropump Inc. is the originator of magnetic drive gear pump technology. Today, Micropump is the market leader in low-flow gear pumps offering standard models, configure-to-order options, and custom solutions. Specializing in OEM and industrial pump applications where precise fluid control is required, Micropump combines state-of-the-art manufacturing with unparalleled engineering expertise to meet its customers' ever-changing fluid handling needs.

www.micropump.com

Precision Polymer Engineering

Operates at the forefront of elastomer component design. Established for over 30 years, we manufacture and supply high performance moulded rubber seals (elastomer seals) and rubber gaskets to various industries around the world.

www.prepol.com

Semrock

The leading provider of optical filters for biotech and analytical instrumentation in the life sciences markets. Semrock's products are used in the biotechnology and analytical instrumentation industries. Semrock produces optical filters using state-of-the-art manufacturing processes which enable them to offer significant improvements in the performance and reliability of their customers' instruments.

www.semrock.com

Trebor International

Trebor manufactures ultra-pure chemical pumps and liquid heating systems used in microelectronic device fabrication, high-grade chemical processing, and the bulk handling of critical fluids for semiconductor microelectronics, solar panels Photovoltaics, and flat panel display TFT/LCD, and markets where process purity and system reliability are of the utmost importance.
